METROPIA

Hello and first of all thank you for buying my Asset !
I hope you will like it. This is my first asset, so I put all my heart in this project.
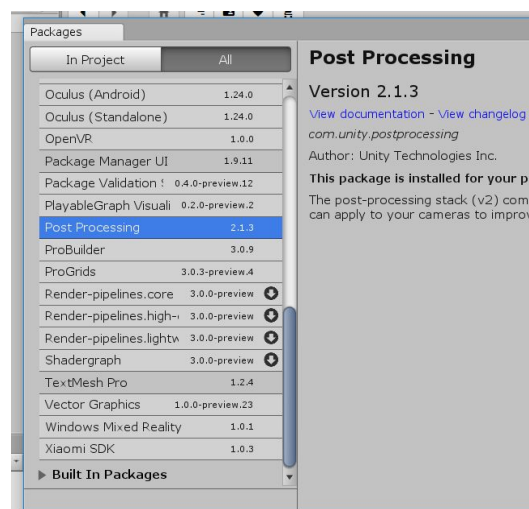

What to do before opening the demo scene:
1 - Import "Post Processing" :

> Use the Unity Package Manager window (in Unity's top menu: **Window** > **Package Manager**)
> Then click the **All** button and select "Post Processing"
> After that , click the **Install** button

2 - Define the **color space** on **linear :**

> This can be selected using the 'Color Space' property from (Edit>Project Settings>Player).

If you have any trouble or any questions or any requests or whatever , please contact me at :
caliari.jordan@gmail.com

I will respond you fastest as posible !

You can contact me too on my ArtStation at this link :
https://www.artstation.com/jordancaliari

Please if you enjoy my pack , you can let your comment on the Asset store , this is nothing for you but a lot for me :)
Have a good day and i wish you the best for your project :) !
